## EDUCATION

### INTI International University

*Bachelor of Computer Science (Hons) major in Software Engineering*

Nilai, Malaysia

Expected May 2022

- Current CGPA 3.77/4.00
- 4 Dean's List Honor Awards
- Dual Award by Coventry University UK

## PROJECTS

### Covid-19 Vaccination Registration and Information System

- Created an app in Android Studio with SQLite allowing users to register for a vaccine at the nearest PPV Centre while allowing users to perform CRUD functions with admin functionality.

### Examination System

- led a team of 5 and built a fully functioning system using PHP to be used in schools by students and faculty where students can attend examinations, view standing and results while giving admin permissions to faculties

### Tourist Promotion Website

- Developed website promoting Mombasa by featuring tourist attractions within the city and providing a gallery highlighting key sights and attractions present within the city.

### Swimming Club Website

- Developed website for INTI Swimming club making use of asp.NET and C# technologies consisting of features such as a mini-E-commerce platform with instant news updates and forums.

### DELL HACK 2 HIRE, IT Development Program Managing Application

- Worked with a team of 4 utilizing Java with MySQL to develop and integrate a fully functioning system that provided participants and PMs the ability to view, host and join events while having an interactive scoring system.

### Final Year Deep Learning Web App

- Built a deep learning web application using Django, python, html, css, bootstrap, javascript and sqlite to classify and segment Cancerous Mammograms. Users can upload a mammogram, predict and segment on the image and see the results.
